SUMMARY

Passionate cybersecurity professional with proven experience in identifying and reporting critical web application vulnerabilities. Successfully disclosed issues like unauthorized group deletion and session mismanagement, earning multiple bug bounties. Skilled in penetration testing, vulnerability assessment, and secure coding. Strong understanding of OWASP Top 10, access control flaws, and incident response. Eager to contribute to proactive security measures and risk mitigation strategies.

PROJECTS

Pictorial Password Authentication

10/2022 - 12/2022

Security System Using Pictorial Passwords

- Implemented a 2-factor Password Authentication using emojis
- Cybersecurity secured the pins/passwords using randomized emojis, making the system resistant to shoulder surfing, dictionary attacks, spyware, and other threats

Slow loris Attack Detection and Prevention System Using Machine Learning

01/2024 - 04/2024

Detect and prevent Slow loris attacks

- Increased cybersecurity by {15%} using Isolation Forest algorithm to prevent Slow loris attacks through Python code development. Analyzed and processed over 100,000 network packets per minute using Wireshark and Python.

Malicious URL Detection Using Machine Learning and Deep Learning

02/2025 - 04/2025

Detect Malicious urls

- Designed a detection system using ML, DL, and NLP to identify malicious URLs with high accuracy
- Integrated Random Forest, SVM, CNN, and RNN for feature extraction and classification
- Developed a real-time API with Flask and React for seamless security integration

EDUCATION

Btech(CSE WITH SPECIALIZATION IN CYBER SECURITY)
-7.42/10

PARUL UNIVERSITY

06/2022 - Present

CLASS XII-56.2

NARAYANA JUNIOR COLLEGE

03/2020 - 06/2022

CLASS X- 99%

NARAYANA EM HIGH SCHOOL GUDIVADA, KRISHNA DISTRICT

2020

TECHNICAL SKILLS AND TOOLS

Penetration testing

Web application pentesting

Malware analysis

Incident response

Node.js

Express.js

Mongo Db

Owasp top 10

Java script

Css

Html

Tcpdump

Burp suite

Kali linux

Wireshark

Nmap

Metasploit

Ida pro

Ollly debbuger

KEY ACHIEVEMENTS

2FA Abuse Recognition

Achieved 33 minutes account lockout through 2FA abuse, rewarded \$200 for the maneuver.

Privilege escalation

Allowed secondary admins to delete groups without authorization; reported responsibly and rewarded \$522.

Privilege Esculation

Found a privilege escalation bug allowing unauthorized community deletion. Reported it responsibly and earned a \$300 bounty. Helped prevent data loss and misuse.

Session Hijacking via Identity Unlinking

Removing linked identity does not invalidate associated sessions and got rewarded 250 dollars
